

COMMITTEE REPORT

Committee: Basin Water Management Committee

Meeting Date: October 14, 2015

Present: D. Michalko (Chair), R. Bow, B. Bowcock, J. Byerrum, D. Arrighi, S. Chapman, G. Galindo, C. Gott, B. Lewis, J. Macias, M. Na, L. Noriega, R. Rich, T. Tait and R. Trejo.

Staff Present: T. Zampielo, Donna DiLaura and S. Johnson

I. Progress Update on USGVMWD Recycled Recharge Project

Committee Chair, David Michalko, introduced this item and stated that Mr. Shane Chapman and Mr. Reymundo Trejo from the Upper San Gabriel Valley Municipal Water District (Upper District) were present to give a progress update on USGVMWD's Indirect Reuse Replenishment Project (IRRP). Mr. Trejo provided a detailed presentation of the project tasks including public outreach efforts, economic analysis, project alternatives, timeline, viability and regulatory requirements. A lengthy discussion followed relative to estimated project costs, water supply sources, and estimated average water supply yields per year.

Mr. Trejo pointed out that the biggest priority right now is to obtain the necessary permits, and then ultimately determine if the project should go forward. Mr. Chapman added that staff has initiated the permit process with both the Army Corp. of Engineers and the Regional Water Quality Control Board. USGVMWD is also working on California Environmental Quality Act requirements. Mr. Trejo stated that he is available to provide project status updates as more information becomes available.
